### SUMMARY

Passionate Frontend Developer with 1.9 years of experience in Angular, responsive design, and performance-focused UI development. Skilled in building scalable, dynamic web applications with clean, maintainable code. Eager to contribute to a forward-thinking team and grow in a challenging frontend role.

### Work Experience

#### Frontend Developer | Benepik Technology Pvt Ltd

June 2023 – Present

- ❖ Spearheaded the development of dynamic, fully responsive web applications using Angular, HTML, CSS, and Bootstrap.
- ❖ Implemented Lazy Loading for optimizing the initial load time of the application.
- ❖ Worked on improving performance by reducing bundle sizes, enhancing change detection strategies, and optimizing data flow using RxJS.
- ❖ Collaborated with the UX/UI team to deliver visually appealing, user-centric designs, ensuring a seamless experience across multiple devices.
- ❖ Integrated third-party libraries like Angular Material and PrimeNG to enhance the user interface and deliver dynamic components.
- ❖ Led the development and maintenance of features using RESTful APIs, managing state using Reactive Forms and RxJS.

### Key Achievements

- ❖ Reduced initial load time by 30% by implementing lazy loading and optimizing API calls.
- ❖ Enhanced user experience by implementing dynamic forms and providing real-time data interaction.

### Awards & Recognition

**Prime Award** – Received last month for exceptional performance and project contributions.

### EDUCATIONS

#### Master of Computer Science (MCS)

GLA University

Graduated: [2022-2024]

#### Bachelor of Computer Science (BCS)

BSA College

Graduated: [2018-2021]

### SKILLS

- ❖ **Frontend Technologies:** HTML5, CSS3, Bootstrap, JavaScript, Angular
- ❖ **Angular Skills:** Lazy Loading, Change Detection Strategies, Angular Material, Angular CLI, Component Communication, Directives, Services, RxJS, Dependency Injection
- ❖ **Performance Optimization:** Lazy Loading, Change Detection Optimization, Code Splitting, Tree Shaking, AOT Compilation
- ❖ **UI/UX & Design:** Responsive Web Design, Mobile-First Approach
- ❖ **Version Control & Collaboration:** Git, GitHub, GitLab
- ❖ **Development Tools:** Visual Studio Code, Angular CLI, Postman, Chrome Developer Tools
- ❖ **Libraries & Frameworks:** Angular Material, PrimeNG, Lodash, RxJS
- ❖ **Additional Skills:** Agile Methodologies, RESTful APIs, Reactive Forms

### PROJECTS

#### Gifter Clone

- ❖ Developed a fully responsive gift management web application using Angular, HTML, CSS, and Bootstrap.
- ❖ Created a dynamic system for generating content using JSON data, allowing for easy updates from APIs or static JSON arrays.

#### Spin the Wheel

- ❖ Built a fully customizable Spin the Wheel application that allows dynamic sector creation and ensures the wheel stops at the desired sector.
- ❖ Implemented Angular, HTML, CSS, and Bootstrap with RxJS for real-time data updates and smooth animations.

#### Kit Management

- ❖ Designed a fully customized Kit Management system where users can add, edit, and maintain subkits and items.
- ❖ Implemented reactive forms for data input and validation, ensuring a seamless user experience.
